Module 13

Module 13: Safety

1. PSSs are Mandatory Reporters but not First Responders.
 - A. True
 - B. False

2. The Safety Data Sheet (SDS) provides information about chemicals, except:
 - a. A. Its makeup
 - b. B. What would be a dangerous exposure to it
 - c. C. How much it costs
 - d. D. What to do if someone is exposure to it
 - e. E. How to clean up spills of it

3. As a PSS you should be alert to possible hazards and report them to your supervisor.
 - True
 - False

4. A fire cannot occur without fuel, heat, and oxygen.
 - True
 - False

5. Oxygen therapy can be a fire hazard.
 - True
 - False

6. A PSS should know their facility's policies and procedures on:
 - a. A. Emergencies
 - b. B. Chemical Hazards
 - c. C. Fire
 - d. D. Disaster Preparedness
 - e. E. All of the above

7. Frayed cords on electrical appliances can start a fire.
 - True
 - False

8. Ripped or frayed carpets are a trip hazard.
 - True
 - False

9. It is safe to plug all appliances into a power strip.
 - True
 - False

10. If the PSS sees a spill or wet spot on a floor, they should ignore it because it is housekeeping's job to take care of it.
- True
 - False
11. Because a PSS may work very closely and frequently with a Consumer, they may be the first to realize that something is not "right" with them.
- True
 - False
